## Evening Brief

Date: Thursday July 19, 2018

---

### Weather Summary

Thunderstorms will spread north into Northern Utah and NE Nevada on Friday. These storms will be a mix of wet and dry. Storms will move further north and west into Nevada on Saturday. Some storms on the leading edge of this moisture may be on the dry side, including over far southern and eastern Idaho/Western Wyoming.

---

### Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	3	Light Initial Attack Activity
National	3	New Fires and Acres: 10 fires for 163.1 acres; 17,376 acres large fire growth

---

Great Basin Fuel Status [interactive link](#) (Use Edge, Chrome or Firefox browsers)

**Fuels and Fire Behavior advisory has been issued for [Nevada](#)**

### Fire Potential

Sagebrush live fuel moisture values are still below normal across Utah, and near record lows for a small area of far western Idaho. Elsewhere across the geographic area the sagebrush live fuel moisture values are closer to normal or even above normal for mid-July, but have peaked and are on the downward trend rapidly due to recent hot/dry weather.

Fire danger values continue to drop over southern Nevada, the AZ Strip and southern Utah, with most areas below the 50th percentile. Over the rest of Utah, ERCs have lowered as well, to between the 50th - 80th percentile. Continued higher humidity and scattered wetting rains into next week over the southern and eastern portions of UT/NV and the AZ Strip will minimize any ignitions from growing rapidly.

ERCs are on the rise over western and northern Nevada into Idaho as dry weather continues, with current ERCs in the 50th - 80th percentile. The significant carryover fuels from 2017 and additional critically dry fine fuel crops from the spring rains in western/northern NV into parts of southern ID/western UT are still significantly contributing to fire spread. Sagebrush fuel moisture continues to decrease in these areas with fuel moisture across portions of western/northern Nevada now below critical levels and contributing to fire spread.

### Resources:

#### Aviation within the Great Basin

- o 1 VLAT, 3 LATs
- o 21 SEATs
- o 11 Type 1 Helicopters / 11 Committed
- o 10 Type 2 Helicopters / 10 Committed
- o 20 Type 3 Helicopters

#### Crews Committed within the Great Basin

- o 13 IHCs Committed / 0 Available
- o 24 T-2 IAs Committed / 10 Available
